

## Contents-Electromagnetic Theory

<b>1. Electrostatics.....</b>	<b>(1-36)</b>
1.1 Coulomb's Law and Superposition Principle	
1.1.1 Electric Field	
1.2 Gauss's Law	
1.2.1 Field Lines and Electric Flux	
1.2.2 Applications	
1.3 Electric Potential	
1.3.1 Curl of Electric field	
1.3.2 Potential of Localized charges	
1.4 Laplace's and Poisson equations	
1.5 Electrostatic boundary condition	
1.6 Work and Energy in electrostatics	
1.6.1 The energy of point charge distribution	
1.6.2 Energy of continuous charge distribution	
1.7 Basic properties Conductors	
1.8 Multiple Expansions	
1.8.1 The Electric Potential and Field of a Dipole	
1.8.2 Approximate potential at large distances	
1.9 Polarization	
1.9.1 The Field of a polarized Object (Bound Charges)	
1.10 The Electric Displacement	
1.10.1 Gauss Law in the Presence of Dielectrics	
1.10.2 Linear Dielectrics (Susceptibility, Permittivity, Dielectric Constant)	
1.10.3 Boundary Condition	
1.10.4 Energy in dielectric system	

### Head office

fiziks, H.No. 40 D, G.F, Jia Sarai,  
Near IIT, Hauz Khas, New Delhi-16  
Phone: 011-26865455/+91-9871145498

### Branch office

Anand Institute of Mathematics,  
28-B/6, Jia Sarai, Near IIT  
Hauz Khas, New Delhi-16

- 1.11 Image problems
  - 1.11.1 The Classic Image problem
  - 1.11.2 Induced Surface Charge
  - 1.11.3 Force and Energy
  - 1.11.4 Other Image Problem
- 2. Magnetostatic.....(37-53)**
  - 2.1 Magnetic force on current element
    - 2.1.1 Current in a wire
    - 2.1.2 Surface current density
    - 2.1.3 Volume current density
  - 2.2 Continuity equation
  - 2.3 Biot-Savart law
    - 2.3.1 Magnetic field due to wire
    - 2.3.2 Magnetic field due to Solenoid and Toroid
  - 2.4 Ampere's Law
  - 2.5 Magnetic Vector Potential
  - 2.6 Magnetostatic boundary condition
  - 2.7 Multiple Expansion of Vector Potential
  - 2.8 Magnetisation
    - 2.8.1 The Field of a magnetized Object (Bound Currents)
  - 2.9 The Auxiliary field **H**
    - 2.9.1 Ampere's Law in in presence of magnetic materials
    - 2.9.2 Magnetic Susceptibility and Permeability
    - 2.9.3 Boundary Condition
- 3. Dynamics of charged particles in static and uniform electromagnetic fields**
  - 3.1 Charged particle in static electric field.....(54-60)
    - 3.1.1 Charged particle enters in the direction of field (**Linear motion**)
    - 3.1.2 Charged particle enters in the direction perpendicular to field  
(**Parabolic motion**)

**Head office**

Hauz Khas, New Delhi-16

## 3.2 Charged particle in static magnetic field

3.2.1 Charged particle enters in the direction perpendicular to field

(Circular motion)

3.2.2 Charged particle enters in the direction making an angle with the field

(Helical motion)

## 3.3 Charged particle in uniform electric and magnetic field (Cycloid motion)

## 4. Electromagnetic Induction.....(61-66)

### 4.1 Faraday's Law

4.1.1 Lenz's Law

4.1.2 Inductance

4.1.3 Energy stored in the field

## 5. Maxwell's Equations.....(67-71)

### 5.1 Maxwell's equation in free space

5.1.1 Electrodynamics before Maxwell's

5.1.2 How Maxwell fixed Ampere's Law

5.1.3 Paradox of charging capacitor

5.1.4 Maxwell's equation in free space

### 5.2 Maxwell's equation in linear isotropic media

### 5.3 Boundary conditions on the fields at interfaces

## 6. Electromagnetic Waves.....(72-87)

### 6.1 Poynting Theorem

### 6.2 Waves in one dimension (Sinusoidal waves)

6.2.1 The wave equation

6.2.2 Terminology

6.2.3 Complex notation

6.2.4 Polarization

### Head office

fiziks, H.No. 40 D, G.F, Jia Sarai,  
Near IIT, Hauz Khas, New Delhi-16  
Phone: 011-26865455/+91-9871145498

### Branch office

Anand Institute of Mathematics,  
28-B/6, Jia Sarai, Near IIT  
Hauz Khas, New Delhi-16

6.3 Electromagnetic waves in vacuum

6.3.1 The wave equation for  $\vec{E}$  and  $\vec{B}$

6.3.2 Monochromatic plane waves

6.3.3 Energy and momentum in Electromagnetic wave

6.4 Electromagnetic waves in matter

6.5 Electromagnetic waves in conductors

**7. Applications of Electromagnetic waves.....(88-95)**

7.1 Reflection and Refraction at Dielectric Interface

7.1.1 Normal incidence

7.1.2 Oblique incidence

7.1.3 Fresnel's relation (Parallel and Perpendicular Polarization)

7.2 Reflection at Conducting Surface

---

**Head office**

fiziks, H.No. 40 D, G.F, Jia Sarai,  
Near IIT, Hauz Khas, New Delhi-16

**Branch office**

Anand Institute of Mathematics,  
28-B/6, Jia Sarai, Near IIT  
Hauz Khas, New Delhi-16

## ADVANCED TOPICS

### **1. Potential and field formulation for time varying fields.....(96-100)**

1.1 Scalar and Vector Potentials

1.2 Gauge Transformation

1.3 Coulomb and Lorentz gauge

1.4 Retarded Potentials

1.4.1 Jefimenko's Equations

1.4.2 Lienard Wiechert Potential

1.4.3 Field of a moving point charge

### **2. Transmission lines and Wave guides.....(101-110)**

2.1 Transmission line

2.2 Waveguides

2.2.1 TE Waves in Rectangular Waveguide

2.2.2 TM Waves in Rectangular Waveguide

### **3. Radiation- from moving charges and dipoles.....(111-113)**

3.1 Radiation

3.1.1 Power radiated by a point charge

3.1.2 Electric dipole radiation

3.1.3 Magnetic dipole radiation

### **EMT Practice Set.....(114-185)**
