

## Content-Thermodynamics & Statistical Mechanics

### 1. Kinetic theory of gases.....(1-13)

#### 1.1 Basic assumption of kinetic theory

##### 1.1.1 Pressure exerted by a gas

#### 1.2 Gas Law for Ideal gases:

##### 1.2.1 Boyle's Law

##### 1.2.2 Charle's Law

##### 1.2.3 Avogadro's Law

##### 1.2.4 Graham's Law of Diffusion

##### 1.2.5 Ideal Gas Equation:

#### 1.3 Kinetic Interpretation of Temperature

#### 1.4 Maxwell-Boltzmann Distribution Law

##### 1.4.1 The Distribution in term of Magnitude

##### 1.4.2 To Determine Value of $\beta$ in term of Temperature $T$

##### 1.4.2 Average Velocity

##### 1.4.3 Root Mean Square Velocity

##### 1.4.4 Most Probable Velocity

### 2. Real Gases.....(14-20)

#### 2.1 Andrew's Experiment on Carbon Dioxide

#### 2.2 van der Waals Equation of State.

#### 2.3 Correction in Ideal Gas Equation to Achieve van der Waals Gas Equation of State.

##### 2.3.1 Correction for Finite Size

##### 2.3.2 Correction for Intermolecular Attraction

##### 2.3.3 Maxwell Equal Area

##### 2.3.4 Critical Point

##### 2.3.5 van der Waals Equation of State and Virial Coefficient

#### Head office

fiziks, H.No. 40-D, G.F, Jia Sarai,  
Near IIT, Hauz Khas, New Delhi-16  
Phone: 011-26865455/+91-9871145498

#### Branch office

Anand Institute of Mathematics,  
28-B/6, Jia Sarai, Near IIT  
Hauz Khas, New Delhi-16

### 3. Basics of Thermodynamics and Laws of Thermodynamics.....(21-30)

#### 3.1 Mathematical Formulations of thermodynamics.

##### 3.1.1 Some important Formulas

#### 3.2 Fundamental Concept

##### 3.2.1 System

##### 3.2.2 Isolated System

##### 3.2.3 Thermodynamical State

##### 3.2.4 State Function

##### 3.2.5 Intensive and Extensive Properties

#### 3.3 The Ideal Gas:

#### 3.4 Laws of Thermodynamics

##### 3.4.1 Zeroth law of Thermodynamics:

##### 3.4.2 First law of Thermodynamics:

##### 3.4.3 Work Done during Different Process.

##### 3.4.4 Specific Heat

##### 3.4.5 Heat Capacity of Ideal Gas:

##### 3.4.6 Molar Heat Capacity

##### 3.4.7 Coefficient of Volume Expansion or Expansivity

##### 3.4.8 Isothermal Elasticity and Isothermal Compressibility

#### 3.5 Different Types of Thermo Dynamical Process and use of First Law of Thermodynamics

##### 3.5.1 Isochoric Process:

##### 3.5.2 Isobaric Process

##### 3.5.3 Isothermal Process

##### 3.5.4 Adiabatic Process

---

#### Head office

fiziks, H.No. 40-D, G.F, Jia Sarai,  
Near IIT, Hauz Khas, New Delhi-16  
Phone: 011-26865455/+91-9871145498

#### Branch office

Anand Institute of Mathematics,  
28-B/6, Jia Sarai, Near IIT  
Hauz Khas, New Delhi-16

**4. Second Law of Thermodynamics and Entropy.....(31-41)**

- 4.1 Second Law of Thermodynamics
- 4.2 Heat Engines
  - 4.2.1 Heat Reservoir
  - 4.2.2 Efficiency of Heat Engine ( $\eta$ )
  - 4.2.3 Carnot Cycle
- 4.3 Entropy
  - 4.3.1 Inequality of Clausius

**5. Maxwell relation and Thermodynamic Potential.....(42-58)**

- 5.1 Maxwell relations
- 5.2 Different types of thermodynamic potential and Maxwell relation
  - 5.2.1 Internal Energy
  - 5.2.2 Enthalpy
  - 5.2.3 Helmholtz Free Energy
  - 5.2.4 Gibbs Energy
- 5.3 Application of Maxwell Relation
  - 5.3.1 First  $T - dS$  Equation
  - 5.3.2 Second  $T - dS$  Equation
  - 5.3.3 Third  $T-dS$  Equation:
  - 5.3.4 First Energy Equation
  - 5.3.5 Second Energy Equation

**6. Postulates of Statistical Mechanics.....(59-63)**

- 6.1 Basic Definition, Mathematical Tools
- 6.2 Postulates of Statistical Mechanics

**7. Micro Canonical Ensemble.....(64-66)**

- 7.1 Definition of Micro Canonical Ensemble
  - 7.1.1 Ergodic hypothesis
  - 7.1.2 Entropy

**Head office**

fiziks, H.No. 40-D, G.F, Jia Sarai,  
Near IIT, Hauz Khas, New Delhi-16  
Phone: 011-26865455/+91-9871145498

**Branch office**

Anand Institute of Mathematics,  
28-B/6, Jia Sarai, Near IIT  
Hauz Khas, New Delhi-16

**8. Canonical Ensemble.....(67-85)**

- 8.1 Partition function for canonical ensemble
- 8.2 Relation between macroscopic variable and canonical partition function  $Z$
- 8.3 The Second law of Thermodynamics and Thermal Interaction Between Systems and Temperature
- 8.4 Relation Between Entropy and Probability
- 8.5 Different system for Canonical ensemble
  - 8.5.1 One Dimensional Free Particle
  - 8.5.2 Classical Harmonic Oscillator
  - 8.5.3 Quantum Harmonic Oscillator
  - 8.5.4 Classical Paramagnetic substance:
  - 8.5.5 Quantum Mechanical Treatment of Spin Half Paramagnetic Substance

**9. Grand Canonical Ensemble.....(86-93)**

- 9.1 Grand Canonical Partition Function :
  - 9.1.1 Thermo dynamical quantities in grand canonical ensemble:
- 9.2 Classical system in a grand canonical ensemble:
  - 9.2.1 Classical Grand Canonical Partition Function of an Ideal Gas
  - 9.2.2 Grand Canonical Partition Function for Classical Harmonic Oscillator
- 9.3 Quantum Mechanical Grand Canonical Partition
  - 9.3.1 Grand Canonical Partition Function for Quantum Harmonic Oscillator

**10. Maxwell-Boltzmann Distribution.....(94-97)**

- 10.1 The total no of arrangements of the particles in the given distributions
  - 10.1.1 Derivation of Maxwell-Boltzmann Distribution
- 10.2 Energy Distribution Function
  - 10.2.1 Energy distribution in different dimension
  - 10.2.2 Average Energy

**Head office**

fiziks, H.No. 40-D, G.F, Jia Sarai,  
Near IIT, Hauz Khas, New Delhi-16  
Phone: 011-26865455/+91-9871145498

**Branch office**

Anand Institute of Mathematics,  
28-B/6, Jia Sarai, Near IIT  
Hauz Khas, New Delhi-16

**11. Bose Einstein Distribution.....(98-105)**

- 11.1 The Bose-Einstein Energy Distribution
- 11.2 Bose-Einstein Gas at High Temperature
- 11.3 Bose Einstein gas at low temperature
- 11.4 Bose Einstein Condensation

**12. Fermi Dirac Distribution.....(106-113)**

- 12.1 Fermi Dirac Distribution
- 12.2 Fermions at High Temperature
- 12.3 Fermions at Low Temperature

**13. Phase Transition and Low Temperature Physics.....(114-141)**

- 13.1 Third Law of Thermodynamics and Attainable of Low Temperature
  - 13.1.1 Production of Low Temperature: The Joule – Kelvin Expansion:
- 13.2 Phase Transition
  - 13.2.1 First Order Phase Transition
    - 13.2.1 Equilibrium Between Two Phases
    - 13.2.2 Clapeyron-Clausius equation
    - 13.2.3 Liquid-Vapour Phase Transition
    - 13.2.4. Properties of First Order Phase Transition
  - 13.3 Second Order Phase Transition
  - 13.4 Landau Theory of Phase Transition
    - 13.4.1 Dimensional Analysis:
  - 13.5 Landau Theory of Second Order Phase Transitions
    - 13.5.1 Order Parameter
    - 13.5.2 Free energy expansion
    - 13.5.3 Minimum Free Energy
  - 13.6 Ising model
    - 13.6.1 One-dimensional Ising model
    - 13.6.2 Renormalization
    - 13.6.3 One-dimensional Ising chain

---

**Branch office**

Anand Institute of Mathematics,  
28-B/6, Jia Sarai, Near IIT  
Hauz Khas, New Delhi-16

**14. Random Walk Problem.....(142-150)**

- 14.1 Types of Distribution function
  - 14.1.1 Binomial distribution
  - 14.1.2 Gaussian Distribution:
  - 14.1.3 Center limit theorem
- 14.2 One Dimensional Random Walk Problem
- 14.3 Ficks Law
  - 14.3.1 For three dimensional system
  - 14.3.2 For two dimensional system
  - 14.3.2 For one dimensional system
- 14.4 Langevin Equation

---
