

Content

Condensed Matter Physics

1. Crystal Structure.....	(1-36)
1.1 Space Lattice	
1.2 Basis	
1.3 Bravais Space Lattice	
1.4 Line and Miller Indices	
1.4.1 Line Indices	
1.4.2 Miller Indices	
1.5 Inter Planar Spacing	
1.6 Crystal Density	
1.7 Atomic Packing Fraction and Crystal Structure	
2. X-Ray Diffraction of Crystal	(37-50)
2.1 Theory of the X-ray diffraction in crystal	
2.1.1. Atomic scattering factor	
2.1.2 Geometric Structure Factor	
2.1.3 Structure factor calculation	
2.2 Bragg's Law	
2.3 Methods of X-ray Diffraction	
3. Reciprocal Lattice.....	(51-59)
3.1 Reciprocal Lattice of Simple Cubic	
3.2 Reciprocal Lattice of Body Centered Cubic	
3.3 Reciprocal Lattice of Face Centered Cubic	
3.4 Brillouin Zones	
4. Bonding in Solids.....	(60-69)
4.1 Ionic Bonding	
4.1 Covalent Bonding	
4.3 Metallic Bonding	
4.4 Vander Wall's Bonds	
4.5 Hydrogen Bonds	

5. Lattice Vibration.....	(70-81)
5.1 Vibration of One-Dimensional Mono-atomic Crystal	
5.2 Vibration of One-Dimensional Di-atomic crystal	
6. Lattice Specific Heat.....	(82-93)
6.1 Classical Theory (Dulong and Petit's Law)	
6.2 Einstein's Theory of Lattice Specific Heat	
6.3 Debye Theory of Lattice Specific Heat	
6.4 Density of states	
7. Free Electron Theory and Electronic Specific Heat	(94-113)
7.1 The classical free electron theory of metals (Drude–Lorentz theory of metals)	
7.1.1. Classical free electron theory –electrical conductivity	
7.1.2 Success of classical free electron theory	
7.1.3 Draw backs of classical free electron theory	
7.2 Sommerfeld's Quantum Theory for electronic heat capacity	
7.3 Hall Effect	
8. Electron Motion in Periodic Potential and Band Theory of Solid.....	(114-129)
8.1 Bloch Theorem	
8.2 Kronig-Penny Model	
8.3 Concept of Effective Mass of Electrons and Holes	
8.4 Classification of material using energy band theory	
9. Superconductivity.....	(130-143)
9.1 Meissner Effect	
9.2 Properties of Superconductor	
9.2.1 Critical Field	
9.2.2 Critical Current	
9.2.3 London Penetration Depth	
9.2.4 Coherence Length	
9.2.5 Isotopic Effect	
9.3 Type-I and Type-II Superconductors	
9.4 BCS Theory	

9.5 Josephson Junction

9.6 Thermodynamics of Superconductivity

10. Defects and Dislocation.....(144-148)

10.1 Defects Classification

10.2.1 Schottky Defects:

10.2.2 Frenkel Defects:

10.3 Dislocations:

10.3.1 Edge Dislocation:

10.3.2 Skew Dislocation:

10.4 Stacking Faults:

Practice Set Questions.....(149-172)

Practice Set Solutions.....(173-207)
